# JOHARI'S QUESTIONS

## PECULIAR THINGS IN THE SOLAR SYSTEM (AS ASKED BY JOHARI)

On our virtual tour of the Solar System, this is what we had to do. One, we needed to visit all eight planets plus Pluto. Two, we needed to do the complete survey of the planet's physical properties like we did for the moon. Three, we needed to find something peculiar and unique about each planet. There is a great NASA website called [Solar System Exploration](#) that you can use to get information on the planets.

1. What is the closest planet to the sun?
2. Would that be a good planet to live on? Explain your answer.
3. What is the most peculiar thing about the closest planet to the sun?
4. What is the second closest planet to the sun?
5. What is the atmosphere on the second closest planet?
6. Why is the temperature on the second closest planet to the sun hotter than the temperature on the closest planet?

## QUESTIONS FOR PECULIAR THINGS IN OUR SOLAR SYSTEM

7. What is the length of a day on Planet Venus?
  
8. What is the most peculiar thing about Planet Venus? Explain the evidence for the peculiar thing.
  
9. What is the third closest planet to the sun?
  
10. What is the fourth closest planet to the sun and what is its surface temperature?
  
11. What is the most peculiar thing about the fourth closest planet to the sun?
  
12. What is the fifth planet from the sun?
  
13. Compared to planet Earth how much bigger is the fifth planet in its size and mass?
  
14. Why couldn't the crew walk on the fifth planet's surface?
  
15. What is the most peculiar thing on the fifth planet? Describe it.

## QUESTIONS FOR PECULIAR THINGS IN OUR SOLAR SYSTEM

16. What are the two most peculiar things about Planet Saturn?
  
17. What are Saturn's rings made of?
  
18. What are the two most peculiar things about Planet Uranus? Explain each one.
  
19. What are the physical features of Planet Neptune?
  
20. What is Neptune's most peculiar feature?
  
21. What is Pluto's most peculiar thing?
  
22. How far is Pluto from the sun?
  
23. What is the temperature on Pluto's surface and why is it so cold?
